

VOLUME 1 FINAL REPORT

1980 CENSUS OF POPULATION AND HOUSING

SIQUIJOR

REPUBLIC OF THE PHILIPPINES

NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

NATIONAL CENSUS AND STATISTICS OFFICE

MANILA

REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY PRESIDENT FERDINAND E. MARCOS

Chairman

Honorable VICENTE B. VALDEPEÑAS, JR.

Minister of Economic Planning and Director-General of the Authority

NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES

Executive Director & Civil Registrar-General

MARCELO M. ORENSE Assistant Executive Director

FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

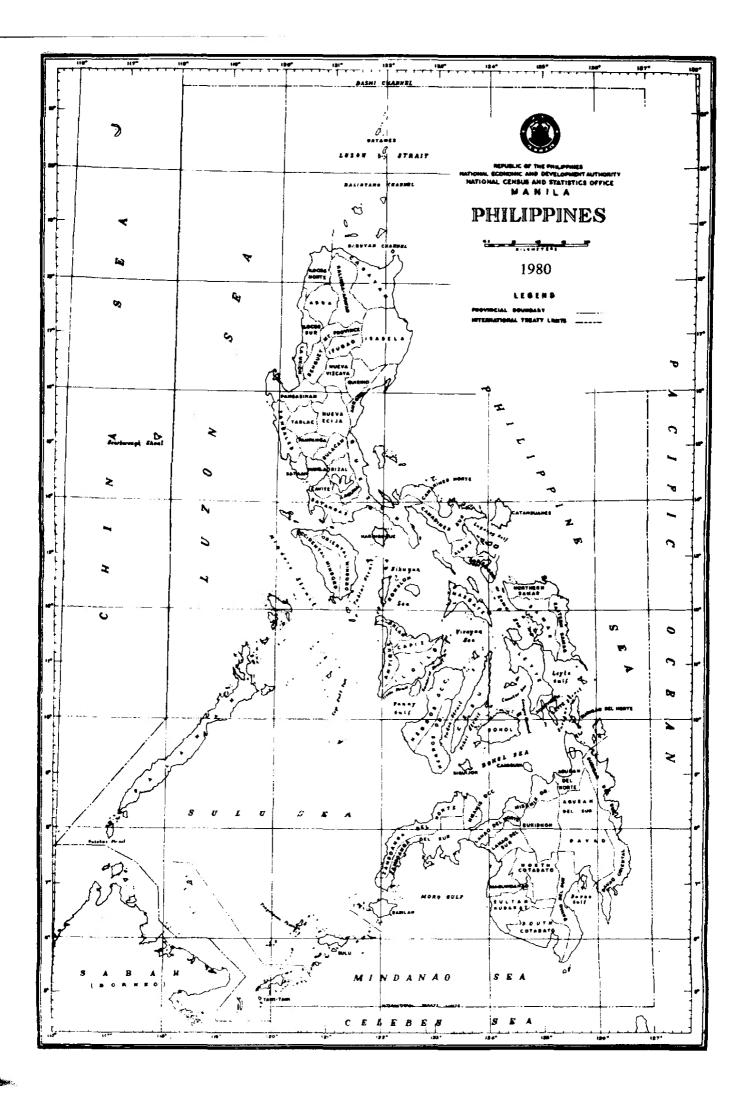

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May I of every censal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
	Type of Building
	Type of Occupancy

Marital Status Construction Materials of Roof and Outer Walls

Highest Grade Completed Year Built

Literacy Floor Area of Dwelling Unit

Language/Dialect Spoken in the Tenure of Owner-Occupant with Respect

Household to the Land

Gainful and Non-Gainful Occupation Kind of Lighting Facilities

Major and Minor Industry Use and Source of Water Supply

Migration Type of Toilet Facilities
Kind of Cooking Fuel
Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I - POPULATION

BARANGAY

Age Sex

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
 (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD .

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II ~ HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial — a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

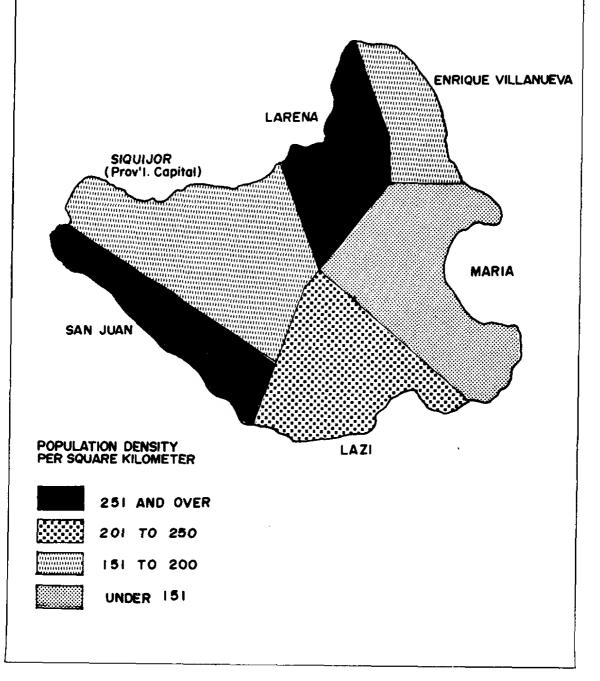

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Area of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway was excluded in determining the floor area.

POPULATION DENSITY OF SIQUIJOR PROVINCE BY MUNICIPALITY: 1980

Siguijor: A Brief Analysis

Siquijor, a small island in the Bohol Sea, is located approximately 30 kilometers southeast of Negros Island. Its area of 343.5 square kilometers is barely 0.11 percent of the total land area of the Philippines. Formerly a sub-province of Negros Oriental, it was established as a separate province on September 16, 1971 under Republic Act No. 6395.

Siquijor Island is mostly made up of limestone rock material and fringed by coral reefs. The center of the island is elevated, the highest point of which is Mt. Malabahog. Level lands consisting of narrow flood plains and deltas are found on the northern and southern coasts of the province.

During the pre-war years Siquijor was the leading producer of manganese ore. Mining began in 1937, but the manganese deposits have now been depleted. However, deposits of aluminum and silver have been found in the island. The main crops grown in the province are coconut and corn. Fishing is an important industry with the Bohol and Mindanao Seas providing rich fishing grounds.

Six municipalities comprise the province with Siquijor as the provincial capital.

POPULATION

As reported in the 1980 census, the population of Siquijor stood at 70,360, the third smallest among the 73 provinces of the country. The latest figure marked an annual growth rate of 0.37 percent, 1.50 percentage points lower than the 1970-1975 growth rate (1.87%). Despite its diminutive population size and low growth rate, the province ranked twentieth in population density – 204.8 in 1980, or an increase of 3.7 persons per square kilometer over that of 1975 (201.1).

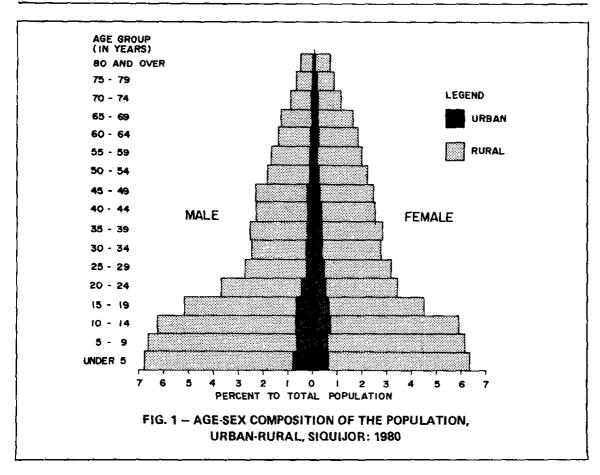

The province is predominantly rural, although it has made significant advances toward urbanization. More than four-fifths, or 88.73 percent of its population reside in rural areas and only 11.27 percent, in urban areas. The proportion of the urban population increased from 7.16 percent to 11.27 percent while the rural population decreased from 92.84 percent to 88.73 percent between 1975 to 1980. Of the total residents, 5.49 percent are urban males and 5.78 percent, urban females. Almost equal proportion of males (44.39%) and females (44.34%) compose the rural population.

The following table shows the distribution of the population, male and female, in urban and rural areas for three censal years:

A BRIEF ANALYSIS

TABLE A – URBAN-RURAL POPULATION BY SEX, SIQUIJOR: 1970, 1975 AND 1980

Area Classification and Sex	1980		19	75	1970		
	Number	Percent	Number	Percent	Number	Percent	
Total	70,360	100.00	69,077	100.00	62,976	100.00	
Male	35,098	49.88	34,690	50.22	30,566	48.53	
Female	35,262	50.12	34,387	49.78	32,410	51.47	
Urban	7,930	11.27	4,947	7.16	4,686	7.44	
Male	3,863	5.49	2,444	3,54	2,213	3.51	
Female	4,067	5.78	2,503	3.62	2,473	3.93	
Rúral	62,430	88.73	64,130	92.84	58,290	92.56	
Male	31,235	44.39	32,246	46.68	28,353	45.02	
Female	31,195	44.34	31,884	46.16	29,937	47.54	

Females slightly outnumbered the males -35,262 against 35,098. This put the sex ratio (number of males per 100 females) at 99.53, lower by 1.35 than the 1975 ratio of 100.88. In the rural areas, the sex ratio reached 100.13 while the urban sector had 94.98.

Figure 1 shows the proportion of males and females, urban and rural, in five-year age groups to the total population. As presented in the graph, both urban and rural population exhibit a pyramid structure, except for slight deviations in the younger age groups of the urban population. Persons 10-14 years old in the urban areas outnumbered those in the lower age brackets.

AGE COMPOSITION

Children below 15 years old comprise 38.20 percent of the total population, 2.17 percentage points lower than the corresponding proportion in 1975. The proportion of persons in the productive age group (15-64 years) increased by only 0.79 percentage point as against 1.03 percentage points between 1970 and 1975. The older age group (65 years and over) represents 7.81 percent of the total population or an increase of 23.68 percent over the 1975 figure.

The accompanying table shows the broad-age distribution of the population from 1970 to 1980:

TABLE B -- AGE COMPOSITION OF THE POPULATION, SIQUIJOR: 1970, 1975 AND 1980

Age jego	1980		197	75	1970		
Composition	Number	Percent	Number	Percent	Number	Percent	
Total	70,360	100.00	69,077	100.00	62,976	100.00	
0-14 years 2732 2	26,876	38.20	27,888	40.37	26,149	41.52	
15-64 years 40, 650	•	53.99	36,746	53.20	32,857	52.17	
65 years and over 589		7.81	4,443	6.43	3,970	6.31	

The median age is 21 years, up from 19 years in 1975, an indication that the population is growing older.

Of the total urban residents, 35.99 percent are 0-14 years old; 56.96 percent, 15-64 and 7.05 percent, 65 years and over. Among the rural folks, 38.48 percent belong to the younger age group (0-14); 53.61 percent, to the productive age group (15-64) and 7.91 percent, to the older age group (65 and over).

With the slight increase in the proportion of persons in the productive age group, the dependency ratio dropped from 87.98 in 1975 to 85.21 in 1980. The urban dependency ratio was considerably lower than the rural ratio – 75.56 and 86.51, respectively, which means that in urban areas there were fewer dependents for every 100 persons in the productive age group, than there were in rural areas.

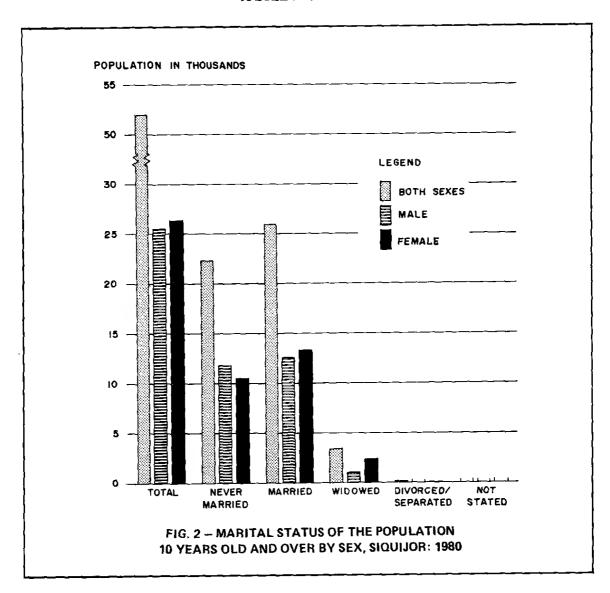

MARITAL STATUS

Of the 52,074 persons 10 years old and over, 42.85 percent were never married, 49.82 percent were married and 6.57 percent were widowed. Only 0.69 percent were divorced or separated while 0.07 percent did not disclose their marital status. Never married persons decreased 3.58 percentage points while the married and the widowed recorded respective increases of 2.18 and 1.06 percentage points within the five-year period. Males were more inclined to remain single (46.20%) than the females (39.60%). On the other hand, females showed a propensity towards marriage (50.51%) than males (49.11%). Likewise, females were more likely to be widowed (8.98%) and divorced or separated (0.79%) than males (4.08% and 0.59%, respectively). The proportion of married males showed an up and down trend – from 47.60 percent in 1970 to 46.52 percent in 1975, then rose to 49.11 percent in 1980. In contrast, the proportion of married females continuously headed upward – from 47.25 percent in 1970 to 48.76 percent in 1975, moving up to 50.51 percent in 1980.

The succeeding table classifies the population by sex and marital status in the last three censal years:

TABLE C -- POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, SIQUIJOR: 1970, 1975 AND 1980

Sex and	19	80	19	75	1970		
Marital Status	Number	Percent	Number	Percent	Number	Percent	
Both Sexes	52,074	100.00	50,311	100.00	45,119	100.00	
Never married	22,313	42.85	23,361	46.43	20,536	45.51	
Married	25,943	49.82	23,970	47.64	21,394	47.42

Not stated	32	0.12	13	0.05	46	0.20	

HIGHEST GRADE COMPLETED

Persons whose educational attainment did not go beyond the elementary level composed 62.93 percent of the private household population 7 years old and over, 4.60 percentage points lower than that of 1975. The decline could be attributed to the increase in the proportion of persons who reached the secondary and college levels. Secondary schoolers made up 18.05 percent, 3.37 percentage points higher than the previous figure (14.68%). Those with college education totalled 5.10 percent, an increase of 1.57 percentage points over the 1975 proportion. Academic degree holders likewise increased from 1.91 percent to 2.45 percent. Meanwhile, the proportion of persons who did not complete any formal education slightly rose to 11.36 percent while that of persons who did not state their educational attainment declined to 0.11 percent.

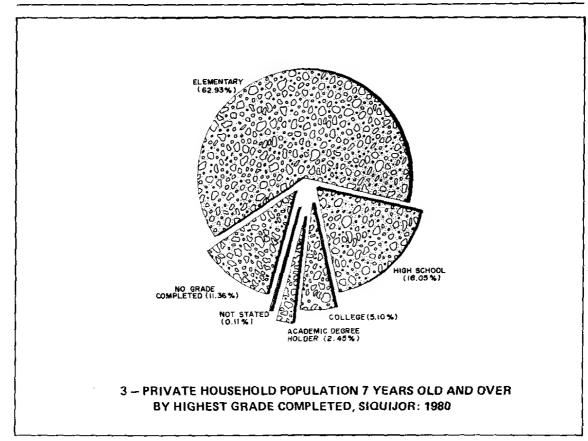

Thirty-five percent (35.15%) of those schooled in the elementary level went as far as the sixth or seventh grade; 30.91 percent completed only the first to third grade; 19.67 percent attained the fourth grade and 14.27 percent, the fifth grade. Less than two-thirds of

those who proceeded to high school did not go beyond third year (63.89%), while 36.11 percent completed the senior year. For every 100 college undergraduates, only 15 attended the fourth or higher year (14.80%); the rest finished any of the lower collegiate years (85.20%).

The following table gives the distribution of the private household population 7 years old and over by highest grade completed in two censal years:

TABLE D - PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, SIQUIJOR: 1975 AND 1980

Highest Grade	19	80	1975		
Completed	Number	Percent	Number	Percent	
Total	57,614	100.00	55,833	100.00	
No grade completed	6,544	11.36	6,317	11.31	
Elementary	36,257	62.93	37,703	67.53	
High school	10,401	18.05	8,193	14.68	
College	2,939	5.10	1,972	3.53	
Academic degree holder	1,413	2.45	1,066	1.91	
Not stated	60	0.11	582	1.04	

LITERACY

For the private household population 10 years of age and older, the literacy rate was 79.18 percent. Literate males made up 80.45 percent and literate females, 77.94 percent of their respective population aged 10 years and over.

Urban literacy rate was considerably higher (90.22%) than the rural literacy rate (77.73%). In both areas males registered more literates (urban -90.64%; rural -79.18%) than their female counterparts (urban -89.85%; rural -76.31%).

LANGUAGE OR DIALECT

Almost all of the private households (99.73%) in Siquijor speak Cebuano. The remaining 0.27 percent speak Tagalog, Bicol, Lineyte-Samarnon (Waray) or llocano. Among the urban households no other dialect is spoken but Cebuano.

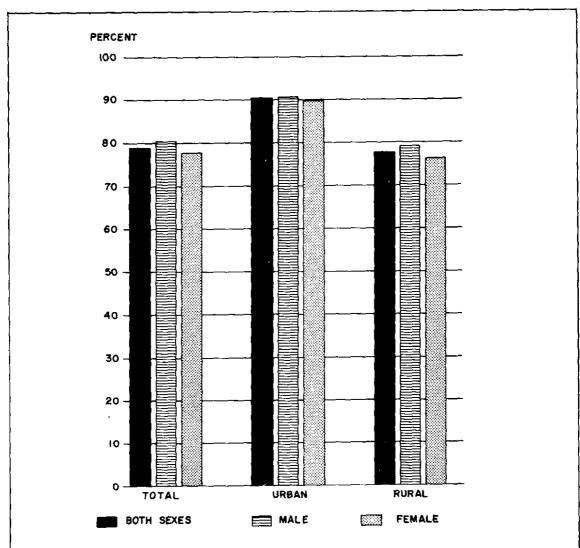

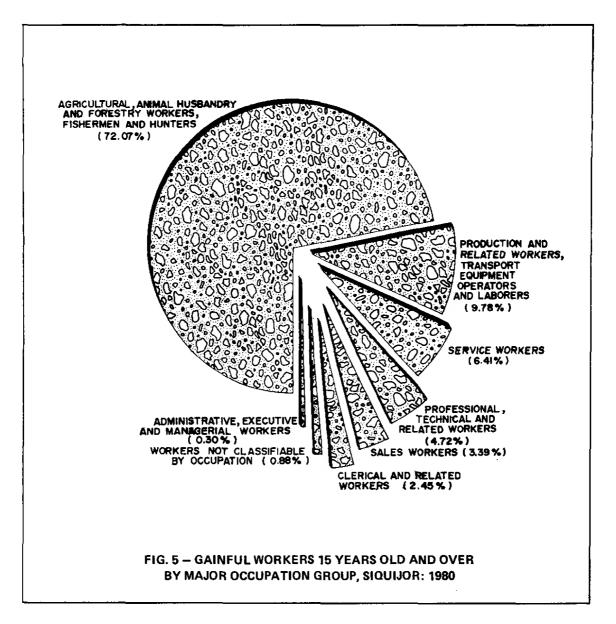

FIG. 4 – PERCENTAGE LITERACY OF PRIVATE HOUSEHOLD POPULATION 10 YEARS OLD AND OVER BY SEX, URBAN-RURAL, SIQUIJOR: 1980

GAINFUL OCCUPATION

Of the private household population 15 years of age and older, 21,520 persons have gainful occupations. This figure represents an increase of 1.72 percent over a period of 5 years.

The preponderance of agricultural, animal husbandry and forestry workers, fishermen and hunters in 1975 (77.10%) was maintained for 1980, although a decrease of 5.03 percentage points is noted. This decline may be attributed to increases registered by some major occupation groups. Except for the administrative, executive and managerial group of workers which dropped from 0.51 to 0.30 percent and sales workers which decreased to 3.39 percent, the following occupation groups posted gains: clerical and related workers, 1.16 percentage points; service workers, 2.37 percentage points; professional, technical and related workers, 0.49 percentage point; production and related workers, transport

equipment operators and laborers, 2.48 percentage points and workers not classifiable by occupation, 0.03 percentage point.

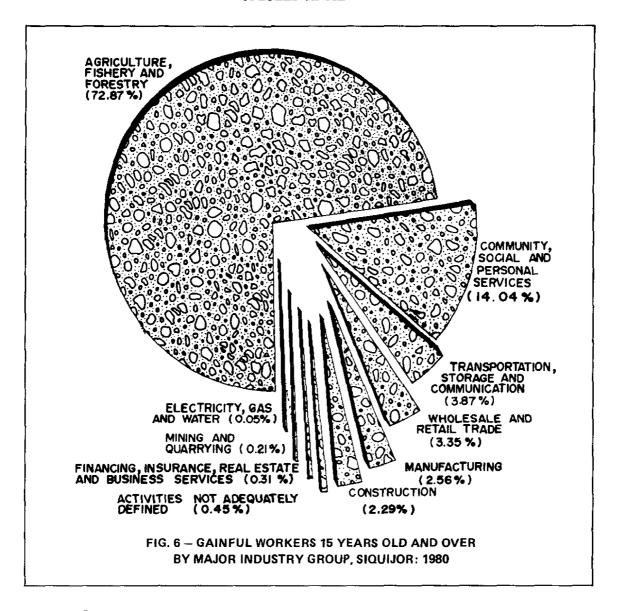

The following table shows the classification of the private household population 15 years old and over by gainful occupation since 1975:

TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, SIQUIJOR: 1975 AND 1980

Major Occupation	19	980	19	75
Group	Number	Percent	Number	Percent
Total	21,520	100.00	21,157	100.00
Professional, technical and related workers	1,016	4.72	895	4.23
Administrative, executive and managerial workers	64	0.30	109	0.51
Clerical and related workers	527	2.45	272	1.29
Sales workers	730	3.39	990	4.68
Service workers	1,380	6.41	854	4.04
Agricultural, animal husbandry and forestry workers, fishermen and hunters	15,509	72.07	16,312	77.10
Production and related workers, transport equipment opera- tors and laborers	2,104	9.78	1,545	7.30
Workers not classifiable by occupation	190	0.88	180	0.85

INDUSTRY

Agriculture, fishery and forestry, the major industry group of Siquijor, account for 72.87 percent of all gainful workers. Agricultural crop production is engaged in by over nine-tenths or 90.85 percent of the agricultural workers and fishery, by 8.28 percent. Only 0.87 percent are in the production of livestock, poultry and other animals or in forestry, agricultural services and hunting, trapping and game propagation. Workers in community, social and personal services comprise 14.04 percent. Three main sources of jobs in this industry group are personal and household services (40.70%), education services (24.55%), and public administration and defense (26.14%). Merely 3.87 percent are in transportation, storage and communication and 3.35 percent, in wholesale and retail trade. Manufacturing employs 2.56 percent; construction, 2.29 percent; activities not adequately defined, 0.45 percent; financing, insurance, real estate and business services, 0.31 percent; mining and quarrying, 0.21 percent and electricity, gas and water, 0.05 percent.

MIGRATION

Most of the private household population 5 years old and over— 95.82 percent of the males and 95.64 percent of the females — lived in the same municipality they had inhabited on May 1, 1975.

A few were residents of another municipality within Siquijor (0.83%) and 3.28 percent, of another province. Residents of a foreign country made up only 0.16 percent. In all three migratory movements, migrants mostly settled in rural areas (Table 10).

TYPE OF BUILDING

Nearly all or 99.07 percent of the 13,485 households of Siquijor occupy single houses. The remaining 0.93 percent are either living in duplex (0.08%), apartment/accesoria/condominium/row house (0.07%), commercial/industrial/agricultural building (0.33%) or in improvised structures like barong-barong (0.45%).

Households in single houses are mostly rural dwellers (89.75%). Those in apartments/accesorias/condominiums/row houses are equally divided between the urban and rural areas. Households occupying all duplexes and most of the improvised structures (91.67%) are from the rural areas while those sheltered in commercial/industrial/agricultural buildings are mostly urban households (88.89%).

The following table shows the housing condition in Siquijor for 1980:

TABLE F - NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, SIQUIJOR: 1980

	19	80	
Type of Building	Number	Percent	
Total	13,485	100.00	
Single house	13,359	99.07	
Duplex	11	0.08	
Apartment/accesoria/condominium/ row house/etc.	10	0.07	
Improvised (barong-barong)	60	0.45	
Commercial/industrial/agricultural	45	0.33	
Other housing unit: natural shelter, boat, etc	-	_	
Hotel, lodging house, dormitory, etc.	-	_	
Institutional (hospital, convent, school dormitory, etc.)	-	-	
Other collective living quarters			

TYPE OF OCCUPANCY

A large majority of the total households (95.39%) own the dwelling units they occupy. The proportion of households in owner-occupied dwelling units differs greatly by area – 96.88 percent of the rural households are homeowners compared to 82.73 percent for the urban sector. Households enjoying rent-free dwelling units make up 3.46 percent. Only 1.04 percent are tenants or lessees and 0.11 percent, subtenants or sublessees (Table 1).

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Dwelling units roofed with cogon or nipa are occupied by 50.60 percent of the total households while those with roof of galvanized iron are occupied by 47.66 percent. The rest live in units with roofs made of other materials such as anahaw (1.39%), tile/concrete/brick/stone (0.19%), makeshift/salvaged materials (0.11%), and asbestos (0.05%).

The largest proportion of households (46.34%) lives in dwelling units with bamboo or sawali for outer walls, followed by those in units with walls of wood or plywood (36.26%). Only 14.61 percent occupy units walled with mixed tile, concrete, brick or stone and wood or plywood; 1.19 percent, tile, concrete, brick or stone; 0.74 percent, cogon or nipa; 0.52 percent, other; 0.19 percent, galvanized iron or aluminum; 0.11 percent, makeshift or salvaged materials; and 0.04 percent, asbestos (Table 2).

YEAR BUILT

More than one-fourth of the households (26.44%) occupy dwelling units built between 1961-1970, followed closely by those residing in units erected between 1976-1980 (25.90%). One-fifth (20.27%) live in units constructed in 1971-1975; 15.41 percent, 1951-1960; 5.73 percent, 1942-1950 and 6.25 percent, 1941 or earlier (Table 2).

FLOOR AREA OF DWELLING UNIT

Majority (59.36%) of the total households in Siquijor occupy dwelling units with floor area less than 30 square meters. Others (27.80%) dwell in 30-49 square-meter units; 6.80 percent, 50-69 square meters; and 3.20 percent, 70-99 square meters. Few households live in 100-149 square-meter units (1.78%) or in more spacious units of 150 square meters or over in floor area (1.06%).

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

A large proportion (82.98%) of the total households that own their dwelling units also owns the land where the structures are constructed. Only 2.32 percent are lessee or sublessee; 6.00 percent, farm lessee or agricultural tenant of landowners; 4.77 percent, with other legal tenure; and 3.93 percent, no tenure such as squatters (Table 1).

SOURCE AND USE OF WATER SUPPLY

For each of the three uses — drinking, kitchen use and washing clothes — the faucet, community water system is the chief source of water supply in the province (Table 6). The proportion of households depending on this source varies slightly by use — 48.04 percent for drinking, 47.50 percent for kitchen use and 41.22 percent for washing clothes. Tubed or piped deep well, the second chief source, is used by 19.69 percent for drinking and 19.70 percent for kitchen use. For washing clothes, however, only 13.45 percent utilize this source compared to 17.96 percent using water from lake, river, stream, etc. Nearly the same proportion of households relies on dug well and spring — 15.32 and 15.00 percent, respectively, for drinking; 15.65 and 15.08 percent for kitchen use. However, a higher proportion of households utilizes spring (14.78%) than dug well (11.13%) for laundry purposes. A few households depend on tubed or piped shallow well — 1.88 percent each for the first two uses and 1.39 percent for the third. The least used sources for drinking and kitchen use are rain and lake, river, stream, etc. (0.07% and 0.19%, respectively).

KIND OF LIGHTING FACILITIES

Kerosene illuminates the dwelling units of 97.15 percent of the total households. A few (1.76%) use electricity, liquefied petroleum gas (0.79%), oil (0.19%) or other kinds (0.11%). Kerosene is widely used in both the urban and rural areas (88.30% of the urban and 98.18% of the rural households). Electricity, however, is used by a higher proportion of urban (11.35%) than rural households (0.64%).

xxxii

COOKING FUEL

Wood or charcoal is the most widely used cooking fuel (97.05%) in the province. Nearly the same proportion of urban (97.04%) and rural households (97.05%) uses wood or charcoal. The rest use kerosene (2.54%), liquefied petroleum gas (0.15%), electricity (0.11%) and other kinds of cooking fuel (0.15%).

TOILET FACILITIES

A higher proportion of the total households uses the water-sealed with other depository (69.26%) than water-sealed with sewer or septic tank (21.99%) type of toilet facility. This is particularly true in the rural areas with 70.89 percent for the former type and 19.50 percent for the latter. The corresponding figures for urban households are 55.46 percent and 43.13 percent. Very few households use the closed pit or antipolo type (2.11%), open pit (1.82%), and other types such as pail system (0.05%). Households without toilet facilities constitute 4.77 percent (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

As shown in Table 9, more than half or 59.57 percent of the households in Siquijor own radios. As expected, more urban (77.80%) than rural households (57.43%) have radios. Only a few households own television sets (0.53%) and refrigerators or freezers (1.45%). Similarly, the proportion of households with these appliances is higher in urban (3.24% and 7.12%, respectively) than in rural areas (0.21% and 0.79%, respectively).
